

Mobile App UI/UX Design Specification

Android and iOS full-flow design document for AI UI generation, product design, and development handoff

Item	Details
Prepared for	UNNG mobile app, iOS and Android, plus web admin dashboard
Purpose	UI/UX design specification that can be passed to a UI/UX AI model, product designer, or development team to generate complete app flows and high-fidelity screens.
Version	1.0 - 2026-05-05
Design direction	Modern, clean, community-first, accessible, low-click, mobile-native, and web-dashboard efficient.
Source basis	UNNG SRS and user flows supplied by the client.

1. Source Requirements Summary

This UI/UX specification is based on the UNNG SRS and user flows provided by the client. The platform includes a cross-platform mobile app for iOS and Android, plus a web admin dashboard. The core product is a membership and community platform with events, donations, subscriptions, organizations, forums, user profiles, transactions, notifications, reporting, and admin management.

Area	UX Interpretation
Primary user value	Join and participate in UNNG community, discover events and organizations, contribute financially, and interact in forums.
Primary admin value	Manage users, events, organizations, subscriptions, transactions, forums, reporting, and configuration from one efficient dashboard.
Business model UX impact	Payment and membership status must be highly transparent because forum posting and paid access depend on payment/subscription state.
Phase approach	Phase 1 must include core membership, events, payments, organizations, forums, profile, transactions, notifications, admin management, and basic KPIs. Phase 2 can add QR check-in, points, courses, advanced analytics, refunds, push notifications, and organization dashboards.

2. Design Principles and Best-Practice Decisions

These decisions keep workflows smooth, modern, and low-friction while respecting iOS, Android, web, and accessibility expectations.

Principle	Decision
Clarity before decoration	Every screen must make the next best action obvious. Use one primary CTA per state and keep secondary actions visually quieter.
Low-click completion	Common actions should complete in 1-3 taps/clicks after the user reaches the relevant screen: register event, donate, subscribe, comment, search, filter, and view transaction.
Progressive disclosure	Show essential information first; reveal advanced filters, details, audit data, and moderation tools only when needed.
Platform-native behavior	Use iOS conventions on iPhone, Material Design navigation/components on Android, and responsive data-table/dashboard patterns on web.
Accessible by default	Meet WCAG 2.2 AA intent: sufficient contrast, clear focus states, large touch targets, keyboard navigability, dynamic type support, and readable labels.
Error prevention and recovery	Validate forms inline, preserve entered data, confirm destructive actions, and provide retry paths for payment, upload, and network failures.
Trust in payments	Always show amount, plan/event name, recurrence, payment processor, terms, and confirmation before launching Revolut Pay.
Community safety	Forum posting must make rules visible, guide users toward respectful content, and support moderation states without surprising users.

3. Shared Visual Design System

3.1 Brand Direction

- Personality: trustworthy, warm, modern, community-focused, and action-oriented.
- Layout style: clean surfaces, rounded cards, generous spacing, readable typography, clear hierarchy.

- Imagery: real community/event photography where possible; avoid generic corporate stock images.
- Tone: simple, plain-language, reassuring, and non-technical.

3.2 Color Tokens

Token	Hex	Usage
Primary 700	#0E5F4D	Main CTAs, active tab, web sidebar active, key success moments
Primary 50	#EAF5F1	Selected chips, success panels, subtle backgrounds
Gold 500	#CBA135	Membership badges, premium plan accents, highlight metrics
Ink 900	#15231F	Primary text and headings
Slate 600	#5D6B66	Secondary text, metadata, helper copy
Surface 50	#F7F8F6	App/page background
White	#FFFFFF	Cards, sheets, modal surfaces
Danger 600	#B42318	Delete, failed payment, destructive warnings
Success 600	#0A7A4F	Paid, success, completed
Info 600	#2563EB	Links, neutral information states

3.3 Typography and Spacing

Token	Mobile	Web Dashboard	Notes
Display / Page title	24-28 sp	28-32 px	Use for major screens only.
Section heading	18-20 sp	20-24 px	Use for grouped content.
Body	15-16 sp	14-16 px	Minimum comfortable reading size.
Metadata	12-13 sp	12-13 px	Dates, labels, counts; must remain legible.
Touch/click targets	Minimum 44x44 pt on iOS, 48x48 dp Android, 32-40 px web with accessible spacing	Never make important actions tiny icons without labels.	
Spacing scale	4, 8, 12, 16, 24, 32	Use consistently across mobile and web.	

3.4 Shared Components

Component	Visual Rule	UX Rule
Primary button	Filled #0E5F4D, white label, 48-52 px/tall mobile, 40 px/tall web	Use for Continue, Pay/Register, Subscribe, Save, Create. Only one primary button per view or dialog.
Secondary button	Outlined primary or neutral	Use for Cancel, Learn More, View Details, Add Later.
Destructive button	Red text or red filled only in final confirmation	Delete profile, delete forum content, disable user/event/org.
Cards	White with 12-16 px radius, subtle border, no heavy shadows	Events, organizations, topics, plan cards, KPI cards.
Bottom tabs	Mobile: Home/Events, Donate, Orgs, Forums, Profile	Keep persistent; avoid hiding primary navigation behind a menu.
Search + filter bar	Search field plus filter chips and bottom sheet/drawer for advanced filters	Use on Events, Organizations, Forums, Users, Transactions.
Status badges	Rounded pills	Paid, Unpaid, Active, Inactive, Pending, Failed, Refunded, Sold Out, Draft, Published.
Data table	Sticky header, sortable columns, filters above, row action menu	Web admin lists for users, events, transactions, orgs, subscriptions, forums.
Empty state	Icon/illustration + specific next action	No events, no transactions, no notifications, no organizations, no forum topics.
Confirmation sheet/dialog	Title, consequence, action summary, Cancel + destructive/primary action	Used for delete, disable, payment confirmation, logout.

4. Accessibility and Inclusive Design Requirements

Requirement	Mobile App	Web Dashboard
Contrast	Text and controls must meet WCAG AA contrast; never rely on color alone for status.	Same; charts require labels/tooltips and non-color differentiation.
Touch/click target	Primary touch targets 44-48 pt/dp minimum; avoid tightly packed icon-only controls.	Clickable controls at least 24 CSS px minimum with clear spacing; main controls 32-40 px.
Screen reader	All icons, images with meaning, buttons, tabs, chips, and form errors need accessible labels.	Tables need column headers, form labels, focus order, and keyboard-accessible menus.
Dynamic type/responsive text	Layouts must survive larger text sizes without clipping.	Browser zoom to 200% should remain usable.
Focus visibility	Native focus for mobile assistive tech; visible focus for web keyboard navigation.	2 px or stronger focus ring, 3:1 contrast against nearby colors.
Error handling	Inline error below field, summary for long forms, do not clear data.	Same; scroll/focus first error after submit.

5. Copywriting and Microcopy Rules

Situation	Recommended Copy Pattern	Avoid
Payment review	"You are about to pay \$50 for Super Hero Subscription. Your membership becomes active after payment is confirmed."	Vague "Proceed" without amount or item.
Upgrade prompt	"Forum posting is available to active members. Subscribe to join the discussion."	Shaming or confusing paywall language.
Payment failed	"Payment was not completed. You were not charged by UNNG. Try again or choose another option."	Technical payment errors without next step.
Delete profile	"This will deactivate your account and log you out. Your previous forum posts may remain as Deleted User."	One-tap destructive delete.
Empty events	"No upcoming events yet. Check back soon or explore organizations."	Blank list.
No transactions	"You have no payments yet. Donations, subscriptions, and event payments will appear here."	"No data."

6. Mobile Information Architecture

Navigation Level	Items	UX Decision
Unauthenticated	Splash, Onboarding, Auth Choice, Sign Up, Sign In, Forgot Password	Keep guest flow linear and short. Social sign-in appears where platform rules support it.
Bottom Tabs	Home, Events, Donate, Forums, Profile	Core user jobs are one tap away. Organizations are promoted on Home and searchable in a dedicated list reached from Home.
Home shortcuts	Membership status, Upcoming event, Donate/Subscribe, Organizations, Latest forum topics	Home acts as a personalized dashboard and reduces clicks for repeat actions.
Profile menu	Edit Profile, Membership Status, Transactions, Notifications, Settings, Delete	Account and history features are grouped in one predictable place.

	Profile	
--	---------	--

7. Mobile Screen Inventory - Complete List

ID	Screen	Role	Purpose	Primary Actions	Key Content
M00	Splash / App Loading	Guest/Any	Show logo, check session, check first-launch flag	Auto-route to onboarding, auth, or app; retry if network/session check fails	Logo, small loading indicator, offline retry message
M01	Onboarding Carousel 1	Guest	Explain UNNG mission and community	Continue / Skip	Hero image, headline, 1 short paragraph, page dots
M02	Onboarding Carousel 2	Guest	Explain membership and contribution value	Continue / Skip	Membership benefits bullets, illustration
M03	Onboarding Carousel 3	Guest	Explain events, forums, organizations	Get Started / Sign In	Three feature cards
M04	Auth Choice	Guest	Choose sign up or sign in quickly	Sign Up, Sign In, Continue with Apple/Google if platform allows	Logo, concise value text, legal links
M05	Sign Up	Guest	Create account with minimal friction	Create Account	Photo optional, name, email, password, terms checkbox, social alternative
M06	Sign In	Guest	Existing user login	Sign In	Email, password, forgot password, social login
M07	Forgot Password	Guest	Request reset email	Send Reset Link	Email, success state, resend timer
M08	Home / Discover	Signed-in	Fast entry point to main actions and status	View events, Donate, Join plan, Continue forum	Welcome, membership badge, upcoming events, contribution CTA, latest forum topics
M09	Events List	All signed-in	Browse and find events	Search, filter, open event	Search, filters, segmented Upcoming/Past, event cards
M10	Event Details - Free	All signed-in	Understand event and register	Register / Add to Calendar	Banner, title, date, location, capacity, description, org link
M11	Event Details - Paid	All signed-in	Understand cost and pay/register	Pay & Register	Price, payment explanation, refund note if configured
M12	Event Payment Confirmation	All signed-in	Avoid payment mistakes before Revolut Pay	Confirm & Pay	Amount, event, date, user email, terms
M13	Payment Processing / Revolut Return	All signed-in	Handle pending success/failure after Revolut Pay	Continue / Retry	Status icon, message, transaction reference
M14	Event Registration Success	All signed-in	Confirm registration	View Ticket/History, Add to Calendar	Event summary, QR placeholder if future enabled
M15	Donate & Subscribe Hub	All signed-in	Choose donation or plan quickly	Donate, Subscribe	Active status, plan cards, one-time donation card
M16	Subscription Plan Details	All signed-in	Compare and choose a plan	Subscribe	Hero \$10, Super Hero \$50, benefits, recurrence, terms
M17	One-Time Donation	All signed-in	Make a custom or preset donation	Donate Now	Preset amounts, custom amount, note optional
M18	Contribution Checkout	All signed-in	Review donation/subscription before Revolut Pay	Confirm & Pay	Amount, recurrence, payment processor, access effect
M19	Organizations List	All signed-in	Find UNNG-connected organizations	Search/filter/open	Search, category chips, org cards with logo
M20	Organization Details	All signed-in	Learn about	Open Website / Contact	Logo, name, category,

			organization and open link		description, link, contact
M21	Forums Categories	All signed-in	Browse communities	Open category	Category cards, topic counts, access badge
M22	Forum Topic List	All signed-in	Read and create topics as allowed	Create Topic if paid, Upgrade if unpaid	Search, filters, topic cards, comment count, last updated
M23	Forum Topic Detail	All signed-in	Read topic and comments	Add Comment, Subscribe prompt, Edit/Delete if owner	Topic body, media, author, comments, report/moderation affordance optional
M24	Create Topic	Paid user	Post topic with media	Publish Topic	Category, title, body, upload images/videos, preview, rules reminder
M25	Edit Topic / Comment	Owner/Paid user	Update own content safely	Save Changes	Existing content, media manager, cancel confirmation
M26	Delete Topic / Comment Confirmation	Owner/Paid user	Prevent accidental deletion	Delete	Consequences, confirmation checkbox for topic if needed
M27	Upgrade Prompt	Unpaid user	Explain why posting is locked	Subscribe	Benefits, plan shortcut, maybe continue reading
M28	Profile Overview	Signed-in	Manage account and key records	Edit Profile, Transactions, Notifications, Membership	Avatar, name, username, paid status, settings list
M29	Edit Profile	Signed-in	Update name/image	Save	Avatar upload, name, username readonly, email readonly
M30	Membership Status	Signed-in	Understand current subscription/paid access	Manage/Renew/Subscribe	Plan, renewal date, benefits, payment status
M31	Transactions List	Signed-in	Review payment history	Open details/filter	Amount, type, related item, status, date
M32	Transaction Detail	Signed-in	Show receipt-like detail	Download/Share receipt if supported	Amount, status, related item, method, reference, date
M33	Notifications List	Signed-in	Read activity and open linked content	Open notification, Mark all read	Read/unread status, topic/comment link
M34	Settings	Signed-in	Control app preferences and account actions	Logout, Delete Profile	Notifications toggle future, legal, app version
M35	Delete Profile	Signed-in	Soft-delete account safely	Delete Account	Warning, data handling copy, final confirmation
M36	Offline/Error State	Any	Recover gracefully	Retry	Plain-language error, preserved form data

8. Mobile Screen Specifications

M00 - Splash / App Loading

Field	Specification
Allowed users	Guest/Any
User goal	Show logo, check session, check first-launch flag
Primary CTA / action	Auto-route to onboarding, auth, or app; retry if network/session check fails
Core content	Logo, small loading indicator, offline retry message
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.

Analytics events	view_m00, primary_action_m00, error_m00 when relevant.
------------------	--

M01 - Onboarding Carousel 1

Field	Specification
Allowed users	Guest
User goal	Explain UNNG mission and community
Primary CTA / action	Continue / Skip
Core content	Hero image, headline, 1 short paragraph, page dots
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m01, primary_action_m01, error_m01 when relevant.

M02 - Onboarding Carousel 2

Field	Specification
Allowed users	Guest
User goal	Explain membership and contribution value
Primary CTA / action	Continue / Skip
Core content	Membership benefits bullets, illustration
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m02, primary_action_m02, error_m02 when relevant.

M03 - Onboarding Carousel 3

Field	Specification
Allowed users	Guest
User goal	Explain events, forums, organizations
Primary CTA / action	Get Started / Sign In
Core content	Three feature cards
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m03, primary_action_m03, error_m03 when relevant.

M04 - Auth Choice

Field	Specification
Allowed users	Guest
User goal	Choose sign up or sign in quickly
Primary CTA / action	Sign Up, Sign In, Continue with Apple/Google if platform allows
Core content	Logo, concise value text, legal links
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable,

	success/confirmation if applicable.
Analytics events	view_m04, primary_action_m04, error_m04 when relevant.

M05 - Sign Up

Field	Specification
Allowed users	Guest
User goal	Create account with minimal friction
Primary CTA / action	Create Account
Core content	Photo optional, name, email, password, terms checkbox, social alternative
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m05, primary_action_m05, error_m05 when relevant.

M06 - Sign In

Field	Specification
Allowed users	Guest
User goal	Existing user login
Primary CTA / action	Sign In
Core content	Email, password, forgot password, social login
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m06, primary_action_m06, error_m06 when relevant.

M07 - Forgot Password

Field	Specification
Allowed users	Guest
User goal	Request reset email
Primary CTA / action	Send Reset Link
Core content	Email, success state, resend timer
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m07, primary_action_m07, error_m07 when relevant.

M08 - Home / Discover

Field	Specification
Allowed users	Signed-in
User goal	Fast entry point to main actions and status
Primary CTA / action	View events, Donate, Join plan, Continue forum
Core content	Welcome, membership badge, upcoming events, contribution CTA, latest forum topics
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in

	except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m08, primary_action_m08, error_m08 when relevant.

M09 - Events List

Field	Specification
Allowed users	All signed-in
User goal	Browse and find events
Primary CTA / action	Search, filter, open event
Core content	Search, filters, segmented Upcoming/Past, event cards
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m09, primary_action_m09, error_m09 when relevant.

M10 - Event Details - Free

Field	Specification
Allowed users	All signed-in
User goal	Understand event and register
Primary CTA / action	Register / Add to Calendar
Core content	Banner, title, date, location, capacity, description, org link
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m10, primary_action_m10, error_m10 when relevant.

M11 - Event Details - Paid

Field	Specification
Allowed users	All signed-in
User goal	Understand cost and pay/register
Primary CTA / action	Pay & Register
Core content	Price, payment explanation, refund note if configured
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m11, primary_action_m11, error_m11 when relevant.

M12 - Event Payment Confirmation

Field	Specification
Allowed users	All signed-in
User goal	Avoid payment mistakes before Revolut Pay
Primary CTA / action	Confirm & Pay
Core content	Amount, event, date, user email, terms
Layout rule	Use a single-column mobile layout with strong vertical hierarchy,

	top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m12, primary_action_m12, error_m12 when relevant.

M13 - Payment Processing / Revolut Return

Field	Specification
Allowed users	All signed-in
User goal	Handle pending success/failure after Revolut Pay
Primary CTA / action	Continue / Retry
Core content	Status icon, message, transaction reference
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m13, primary_action_m13, error_m13 when relevant.

M14 - Event Registration Success

Field	Specification
Allowed users	All signed-in
User goal	Confirm registration
Primary CTA / action	View Ticket/History, Add to Calendar
Core content	Event summary, QR placeholder if future enabled
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m14, primary_action_m14, error_m14 when relevant.

M15 - Donate & Subscribe Hub

Field	Specification
Allowed users	All signed-in
User goal	Choose donation or plan quickly
Primary CTA / action	Donate, Subscribe
Core content	Active status, plan cards, one-time donation card
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m15, primary_action_m15, error_m15 when relevant.

M16 - Subscription Plan Details

Field	Specification
Allowed users	All signed-in
User goal	Compare and choose a plan
Primary CTA / action	Subscribe
Core content	Hero \$10, Super Hero \$50, benefits, recurrence, terms

Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m16, primary_action_m16, error_m16 when relevant.

M17 - One-Time Donation

Field	Specification
Allowed users	All signed-in
User goal	Make a custom or preset donation
Primary CTA / action	Donate Now
Core content	Preset amounts, custom amount, note optional
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m17, primary_action_m17, error_m17 when relevant.

M18 - Contribution Checkout

Field	Specification
Allowed users	All signed-in
User goal	Review donation/subscription before Revolut Pay
Primary CTA / action	Confirm & Pay
Core content	Amount, recurrence, payment processor, access effect
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m18, primary_action_m18, error_m18 when relevant.

M19 - Organizations List

Field	Specification
Allowed users	All signed-in
User goal	Find UNNG-connected organizations
Primary CTA / action	Search/filter/open
Core content	Search, category chips, org cards with logo
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m19, primary_action_m19, error_m19 when relevant.

M20 - Organization Details

Field	Specification
Allowed users	All signed-in
User goal	Learn about organization and open link
Primary CTA / action	Open Website / Contact

Core content	Logo, name, category, description, link, contact
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m20, primary_action_m20, error_m20 when relevant.

M21 - Forums Categories

Field	Specification
Allowed users	All signed-in
User goal	Browse communities
Primary CTA / action	Open category
Core content	Category cards, topic counts, access badge
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m21, primary_action_m21, error_m21 when relevant.

M22 - Forum Topic List

Field	Specification
Allowed users	All signed-in
User goal	Read and create topics as allowed
Primary CTA / action	Create Topic if paid, Upgrade if unpaid
Core content	Search, filters, topic cards, comment count, last updated
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m22, primary_action_m22, error_m22 when relevant.

M23 - Forum Topic Detail

Field	Specification
Allowed users	All signed-in
User goal	Read topic and comments
Primary CTA / action	Add Comment, Subscribe prompt, Edit/Delete if owner
Core content	Topic body, media, author, comments, report/moderation affordance optional
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m23, primary_action_m23, error_m23 when relevant.

M24 - Create Topic

Field	Specification
Allowed users	Paid user

User goal	Post topic with media
Primary CTA / action	Publish Topic
Core content	Category, title, body, upload images/videos, preview, rules reminder
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m24, primary_action_m24, error_m24 when relevant.

M25 - Edit Topic / Comment

Field	Specification
Allowed users	Owner/Paid user
User goal	Update own content safely
Primary CTA / action	Save Changes
Core content	Existing content, media manager, cancel confirmation
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m25, primary_action_m25, error_m25 when relevant.

M26 - Delete Topic / Comment Confirmation

Field	Specification
Allowed users	Owner/Paid user
User goal	Prevent accidental deletion
Primary CTA / action	Delete
Core content	Consequences, confirmation checkbox for topic if needed
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m26, primary_action_m26, error_m26 when relevant.

M27 - Upgrade Prompt

Field	Specification
Allowed users	Unpaid user
User goal	Explain why posting is locked
Primary CTA / action	Subscribe
Core content	Benefits, plan shortcut, maybe continue reading
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m27, primary_action_m27, error_m27 when relevant.

M28 - Profile Overview

Field	Specification
Allowed users	Signed-in
User goal	Manage account and key records
Primary CTA / action	Edit Profile, Transactions, Notifications, Membership
Core content	Avatar, name, username, paid status, settings list
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m28, primary_action_m28, error_m28 when relevant.

M29 - Edit Profile

Field	Specification
Allowed users	Signed-in
User goal	Update name/image
Primary CTA / action	Save
Core content	Avatar upload, name, username readonly, email readonly
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m29, primary_action_m29, error_m29 when relevant.

M30 - Membership Status

Field	Specification
Allowed users	Signed-in
User goal	Understand current subscription/paid access
Primary CTA / action	Manage/Renew/Subscribe
Core content	Plan, renewal date, benefits, payment status
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m30, primary_action_m30, error_m30 when relevant.

M31 - Transactions List

Field	Specification
Allowed users	Signed-in
User goal	Review payment history
Primary CTA / action	Open details/filter
Core content	Amount, type, related item, status, date
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m31, primary_action_m31, error_m31 when relevant.

M32 - Transaction Detail

Field	Specification
Allowed users	Signed-in
User goal	Show receipt-like detail
Primary CTA / action	Download/Share receipt if supported
Core content	Amount, status, related item, method, reference, date
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m32, primary_action_m32, error_m32 when relevant.

M33 - Notifications List

Field	Specification
Allowed users	Signed-in
User goal	Read activity and open linked content
Primary CTA / action	Open notification, Mark all read
Core content	Read/unread status, topic/comment link
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m33, primary_action_m33, error_m33 when relevant.

M34 - Settings

Field	Specification
Allowed users	Signed-in
User goal	Control app preferences and account actions
Primary CTA / action	Logout, Delete Profile
Core content	Notifications toggle future, legal, app version
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m34, primary_action_m34, error_m34 when relevant.

M35 - Delete Profile

Field	Specification
Allowed users	Signed-in
User goal	Soft-delete account safely
Primary CTA / action	Delete Account
Core content	Warning, data handling copy, final confirmation
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m35, primary_action_m35, error_m35 when relevant.

M36 - Offline/Error State

Field	Specification
Allowed users	Any
User goal	Recover gracefully
Primary CTA / action	Retry
Core content	Plain-language error, preserved form data
Layout rule	Use a single-column mobile layout with strong vertical hierarchy, top app bar where needed, and persistent bottom tabs after sign-in except during checkout/payment review and focused forms.
States to generate	Default, loading, empty if applicable, inline validation, offline/network error, permission/access denied if applicable, success/confirmation if applicable.
Analytics events	view_m36, primary_action_m36, error_m36 when relevant.

9. Mobile Workflow Map and Edge Paths

Workflow	Happy Path Screens	Alternate / Error Paths
New user registration	M00 -> M01 -> M02 -> M03 -> M04 -> M05 -> M08	Email duplicate -> show inline error and deep link to M06. Weak password -> keep values and show password rules. Social auth returns missing name -> request name only.
Existing user sign in	M00 -> M04 -> M06 -> M08	Invalid credentials -> inline error. Forgot password -> M07. Disabled account -> contact/support message.
Social sign-in	M04/M05/M06 -> Apple on iOS or Google on Android -> M08	New account created if email not found; existing account linked/signed in; cancelled auth returns to same screen.
Free event registration	M09 -> M10 -> success state M14	Sold out -> disable CTA and show waitlist only if future scope. Already registered -> show Registered badge and calendar action.
Paid event registration	M09 -> M11 -> M12 -> Revolut Pay -> M13 -> M14	Payment failed/cancelled -> M13 retry. Pending -> show pending badge and transaction in M31.
Donation	M15 -> M17 -> M18 -> Revolut Pay -> M13 -> M31/M08	Custom amount invalid -> inline validation. Cancelled payment -> retry or change amount.
Subscription	M15 -> M16 -> M18 -> Revolut Pay -> M13 -> M30/M08	Activation delayed -> show pending membership, restrict forum posting until confirmed unless business rule changes.
Organization browsing	M19 -> M20 -> external link	Broken external link -> show cannot open message. No orgs -> empty state.
Unpaid forum reading	M21 -> M22 -> M23 -> M27 if user taps post/comment	If topic restricted -> show access message. User can continue reading public/allowed topics.
Paid forum posting	M21 -> M22 -> M24 -> M23	Media too large -> compress guidance. Category disabled while posting -> prevent publish and preserve draft.
Comment and reply notification	M23 add comment -> notification created -> M33 -> M23 anchor to comment	Deleted topic/comment -> notification opens safe fallback message.
Edit/delete own content	M23 -> M25 or M26 -> M23	Ownership check fails -> hide action and block server-side. Deleted content updates counts.
Profile update	M28 -> M29 -> M28	Image upload fail -> keep name changes possible; retry image.
Delete profile	M28/M34 -> M35 -> logout to M04	Soft delete recommended; forum posts remain as Deleted User.
View history	M28 -> M31 -> M32	No transactions -> empty state with Donate/Event CTA.

10. Detailed Mobile UX Decisions by Module

Module / Pattern	Decision	Reason
Onboarding carousel	3 screens max, skip available, 1 primary CTA	Do not force account creation before explaining value. Store first-launch completion locally.
Bottom navigation	5 tabs: Home, Events, Donate, Forums, Profile. Organizations reached from Home and a Home card; if organizations become high-traffic, replace Home or Donate with Orgs based on analytics.	Keeps core tasks one tap away while avoiding 6-tab overflow.
Events cards	Image, title, date, location, price badge, registration badge	Tap anywhere on card opens details; Pay/Register only appears on detail to reduce accidental payments.
Payment review	Always insert a review screen before Revolut Pay	Reduces disputes and allows the user to verify amount, recurrence, and item.
Forum access	Read allowed content first, then show upgrade prompt only when action is blocked	Avoids dead-end paid walls and increases conversion through context.
Profile actions	Group by Account, Payments, Activity, Settings	Makes transactions and notifications easy to find without deep nesting.

11. Mobile Forms and Validation Rules

Form	Fields	Validation / Defaults	Submission Behavior
Sign Up	Image optional, name, email, password, terms checkbox	Name required, valid email, unique email, password rules visible, image type/size limit	Create account, generate username like UNNGUser0005, sign user in, route to Home.
Sign In	Email, password	Valid email, password required	Sign in and route to prior intended screen or Home.
Forgot Password	Email	Valid email; neutral success copy whether or not email exists	Show sent state with resend timer.
Edit Profile	Image, name	Name required; image optional and validated	Save without requiring password; show success toast.
Create Topic	Category, title, body, images/videos optional	Paid user required; title/body required; media limits; category active	Publish and route to topic detail; preserve draft on errors.
Comment	Comment body, media optional if allowed	Paid user required if restricted; body required; media limits	Post inline, update comment count, notify relevant users.
Donation	Preset or custom amount, optional note	Amount positive, currency shown, custom amount within configured min/max	Review screen, then Revolut Pay.
Event Creation not in mobile	N/A	Admin only on web	N/A

12. Mobile Payment UX Requirements

Payment Type	Before Payment	During / Return	After Payment
Paid event	Show event, date, price, cancellation/refund note if configured, and Confirm & Pay.	Revolut Pay opens. Return state can be successful, pending, failed, or cancelled.	Register event only after success; create transaction for every attempt.
One-time donation	Show amount, donation label, optional note, and “one-time payment” copy.	Same Revolut return handling.	Show thank-you state and transaction history. Does not grant forum access unless

			business confirms.
Subscription	Show plan, price, recurrence, benefits, forum-access effect, and terms.	Same Revolut return handling.	Activate paid/member status after confirmed success. Show membership badge.

13. Mobile Role and Permission Matrix

Feature	Guest	Registered Unpaid	Paid Member	Organization User
Onboarding	View	N/A after first launch unless reset	N/A	N/A
Events	Limited/public if enabled	View/search/filter/register/pay	View/search/filter/register/pay	Same plus org association if visible
Donations/subscriptions	Prompt sign in first	Donate/subscribe	Donate/manage status	Same
Organizations	Public list if allowed	View/search/filter/details	Same	May see linked org badges/details
Forums	Prompt sign in	Read allowed content only	Read/create/edit/delete own topics/comments	Same as paid/unpaid status
Profile	N/A	View/edit/delete/history/notifications	Same plus membership status	Same plus org links if visible

14. Mobile Empty, Loading, Error, and Success States

Area	Empty State	Loading State	Error State	Success State
Events	No upcoming events; CTA Explore organizations	Skeleton event cards	Could not load events; Retry	Registered / paid confirmation
Organizations	No organizations available yet	Skeleton org cards	Could not load organizations; Retry	External link opened
Forums	No topics in this category; paid users see Create Topic	Skeleton topic cards	Could not load topics; Retry	Topic/comment posted
Transactions	No payments yet; CTA Donate or View Events	Skeleton rows	Could not load transactions; Retry	Receipt displayed
Notifications	No notifications yet	Skeleton notification rows	Could not load notifications; Retry	Marked as read/opened related content
Profile image upload	Default avatar	Upload progress	Upload failed; Retry	Profile updated

15. Mobile Edge Cases and Loophole Prevention

Scenario	Required UX / System Behavior
Network unavailable	Show non-blocking offline banner where possible; preserve form input; retry button on blocking screens.
Session expired	Redirect to sign in with message; after login return to intended screen when safe.
Payment pending	Create pending transaction; show pending state; do not grant paid-only permissions until confirmed unless business decides otherwise.
Payment failed/cancelled	Show clear failure/cancelled copy, retry payment, change payment item, or return safely.
Duplicate account email	Do not expose whether account exists beyond normal sign-up error; suggest sign in/reset password.
Event sold out	Disable registration CTA; show Sold Out badge and capacity details.
Event disabled after user opens detail	Prevent registration/payment and show event no longer available.
Category disabled while user creates topic	Block publish, preserve draft, route back to available categories.

User tries to edit another user content	Hide actions client-side and enforce server-side permission denial.
Deleted user forum content	Show author as Deleted User; preserve content unless moderation/legal rules require removal.
Admin disables user	User cannot sign in or post; preserve historical transactions and content.
Organization inactive	Hide from app list, keep relationships and admin record.
Large media upload	Show size/type rules before upload; progress, cancel, retry; graceful compression if supported.
Specific-user topic access	Topic hidden unless user is in access list or admin. Direct link shows no-access state.

16. Mobile AI Design Generator Instructions

Generate complete high-fidelity iOS and Android flows for the UNNG mobile app using the screen inventory and workflow tables in this document. Use a modern community-membership visual style with deep green primary color (#0E5F4D), gold membership accent (#CBA135), rounded cards, clean typography, accessible contrast, and platform-native components. Produce every listed screen, every empty/loading/error/success state, and every alternate path. Prioritize minimal taps: key user actions should be visible in context and should not require deep menus. Keep iOS and Android visually consistent but use native navigation, sheets, permission prompts, social sign-in, date pickers, and accessibility behavior for each platform.

17. Mobile Design QA Checklist

- Every screen ID M00-M36 has a default, loading, error, and relevant empty/success state.
- Every destructive action has confirmation and explains consequence.
- Every payment flow has a review screen before Revolut Pay and a clear return state after Revolut Pay.
- Unpaid users can read allowed forum content but cannot accidentally post; upgrade prompt appears contextually.
- Users can finish common tasks in 1-3 taps from the relevant tab.
- All tables/lists have search or filters where useful: events, organizations, topics, transactions, notifications.
- All permission restrictions are reflected in UI and must be enforced by backend.
- All text supports dynamic type and all controls meet mobile touch target requirements.
- iOS uses Apple-native conventions; Android uses Material-native conventions while preserving the shared brand.

18. Reference Best-Practice Sources Used

- Apple Human Interface Guidelines - platform-native iOS interaction and navigation guidance.
- Google Material Design - Android component and interaction guidance.
- Nielsen Norman Group mobile UX and form usability guidance - clear information architecture, reduced cognitive load, and low-friction forms.
- W3C WCAG 2.2 and WCAG-to-mobile guidance - accessibility requirements for contrast, focus, target size, labels, and keyboard/screen-reader support.
